

# CUSTOM RATES SURVEY

## Grain Harvesting Operations 1999

## PREFACE

The Custom Rates Survey is conducted for Alberta Agriculture, Food and Rural Development by the Department Statistics and Data Development Unit.

The data presented in this report was obtained by contacting custom operators and dealers and thus represent actual charges. Please note that some instances may be Good Neighbour Rates as opposed to Commercial Rates. The reader should be aware that varying conditions in different areas of the province can significantly affect the rates charged from year to year.

The intent of the survey is to provide producers with additional information to help with their farm management decisions. The quality of data is dependent on the cooperation received by producers as well as commercial custom operators. We would like to thank all those who were so willing in helping to provide information. If you are involved in any custom operations and have not been contacted, but wish to contribute please contact me.
